

SAKSHAM SHARMA

AI / LLM ENGINEER

Greater Noida / Delhi NCR | +91 9068291352 | sakshamsharma905@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

AI-focused Software Engineer with 2 years of enterprise product-development experience at Care Health Insurance, building and supporting production systems on IBM i/AS400 while independently developing hands-on expertise in LLM engineering, RAG, AI agents, fine-tuning, evaluation and deployment. Built a modular RAG framework published on PyPI, multi-agent systems with guardrails/evals, and QLoRA fine-tuning workflows. Brings production support, system integration, UAT, SQL and cross-functional delivery experience to practical AI engineering.

TECHNICAL SKILLS

AI / LLM	LLMs, Generative AI, RAG, AI Agents, Agentic Workflows, Fine-Tuning, QLoRA/LoRA, PEFT, Prompt Engineering, Embeddings, Hybrid Retrieval, Reranking, Context Compression, LLM Evaluation, MCP
Frameworks / Data	Python, PyTorch, Hugging Face Transformers, SentenceTransformers, Qdrant, BM25, CrewAI, FastAPI, Pandas, NumPy, Scikit-learn, SQL
Cloud / DevOps	Docker, AWS, Kubernetes, Jenkins, Terraform, Ansible, GitHub Actions, CI/CD, Linux, Vercel, Render, Git
Enterprise	IBM i / AS400, COBOL debugging, UAT, Production Support, System Integration, Product Design, Jira, Redmine

PROFESSIONAL EXPERIENCE

Care Health Insurance | Product Developer Aug 2024 - Present | Gurgaon

- Develop and maintain enterprise insurance applications on IBM i/AS400, working across backend logic, product configuration, SQL, UAT and production support for business-critical workflows.
- Contribute to product-base design in Eximius and debug generated COBOL during issue analysis; coordinate change requirements, testing, production promotions and fixes with product, QA, portal and platform teams.
- Serving as a domain Expert and AI Engineer on Skynet/Product Console; an internal automation initiative designed to reduce manual AS400 schema and product-configuration work and improve repeatability of legacy workflows.
- Supported Sigma, Care Health Insurance's in-house premium calculation platform, through product logic clarification, BRDs, integration/UAT support and production issue resolution across multiple consuming portals/APIs.
- Apply a production-engineering mindset to AI work through hands-on projects spanning retrieval systems, agent workflows, model adaptation, evaluation, API integration and deployment.

PROJECTS

Skynet - Product Console Automation · Live

Care Health Insurance · Enterprise Automation · IBM i/AS400 · UAT / Production

AI Engineer and Domain Expert for an internal automation initiative that streamlines manual AS400 product/schema configuration. Worked on flow design, product logic, testing, COBOL debugging and cross-team coordination while keeping the project grounded in existing enterprise processes.

RAGOON-X1 - Modular RAG Framework | GitHub · Live

Python · Qdrant · BM25 · BGE Embeddings · Cross-Encoder · Groq · PyPI

Built a configurable RAG framework covering ingestion, chunking, dense + sparse retrieval, hybrid search, query rewriting, multi-query expansion, reranking, context compression and LLM generation. Packaged with CLI workflows and published as ragoonx; validated across datasets totaling 1M+ documents.

AgentArena - Multi-Agent Debate & Evaluation System | GitHub · Live

Python · LLM Agents · Guardrails · Evals · Telemetry · Logging · Render

Built a Proposer/Opposer/Judge multi-agent debate system with multi-round context, rebuttals, LLM judging, safety guardrails, evaluation hooks, telemetry and logging. Deployed a live browser experience while preserving a structured agent orchestration backend.

CrewAI Engineering Team - Multi-Agent Software Workflow | GitHub · Live

Python · CrewAI · Multi-Agent Orchestration · Gradio · Rate-Limit Handling

Built a resumable multi-agent workflow coordinating engineering lead, backend, frontend and testing agents to generate a trading-simulation application. Added multi-model execution and retry/rate-limit handling for reliable long-running agent workflows.

Price Fine-Tuning - QLoRA Product Price Estimator | GitHub

Llama 3.2 3B · QLoRA · PEFT · Quantization · Benchmarking

Fine-tuned Llama 3.2 3B with QLoRA to estimate product prices from text descriptions and built a benchmark dashboard comparing base and adapted models. Project demonstrates parameter-efficient fine-tuning, quantized inference and evaluation; work remains in progress.

EDUCATION & CERTIFICATIONS

B.Tech - Computer Science & Engineering | ITS Engineering College, Greater Noida | 2020-2024 | 74%

AI Engineer Core Track: LLM Engineering, RAG, QLoRA, Agents - Udemy · Ed Donner / Ligency · Aug 2026 | [Certificate](#)
